EXPLORE

If you are trying to figure out who you are and where you are going then you are probably in the Explore phase. Whether a freshman, graduate student, alumni or somewhere in between, you can figure out who you are as a person with meaningful career options that align with your values, interests, personality, skills, strengths and motivations.

EXPERIENCE

The Experience phase means you are ready to actively try things out to see what you like and what you don't like, as well as develop relevant skills for your personal and professional growth. This phase is all about prioritizing values, putting theory to practice and building your résumé.

ACHIEVE

This phase is about applying all the hard work you've done through academics, campus internships and other career-related experiences. You are living in the Achieve phase when you are able to articulate who you are and where you would like to go professionally.
